

TREOCARE

HEALTHCARE CREATORS · FOR LICENSED CLINICIANS WITH AN AUDIENCE

Built for Healthcare Creators

Share science you actually believe in — protect the license you worked for.

WHY ACEMANNAN, WHY YOU

Acemannan is the most-researched immune polysaccharide in nature: 40+ years of peer-reviewed science, 200+ studies, US Patent No. 5,106,616 (Dr. H. Reg McDaniel, MD). One foundational molecule, not a stack — easy to explain on camera, easy for your audience to feel.

Most clinicians get pitched supplement programs they can't defend. Acemannan is different: structure/function support backed by patent-grade research and decades of safety data. You can stand behind it on social, and your audience can search the references themselves.

HOW HEALTHCARE CREATORS EARN

Two streams of income, both paid weekly. Same program as our top wellness creators — same 35% top tier.

Stream 1 — New Customer Acquisition. Flat 20% commission on every new customer's first order. Average first order ≈ \$125 → ~\$25 per new customer.

Stream 2 — Customer Retention (Flexship). Tiered 5–35% on customer re-orders, based on your trailing 4-week volume.

TIER	TRAILING 4-WEEK VOLUME	COMMISSION RATE
1	\$0 – \$500	5%
2	\$501 – \$2,000	20%
3	\$2,001 – \$4,000	30%
4	\$4,001+	35%

A REAL RESULT

A growing cohort of nurse practitioners and RNs — led by a Tennessee group with strong social-media reach — have built meaningful affiliate income while educating their audiences on foundational immune health. Results vary by audience size, engagement, and retention; we share what is real and replicable.

PRACTICE PROTECTION

FTC disclosure. Use "#ad" or "affiliate link" on every public-facing post. We provide templates.

Patient-facing disclosure. If you recommend acemannan to your own patients, disclose the affiliate relationship in writing before any recommendation — standard ethics across most state boards.

Structure/function language only. Share the science framing ("40+ years, 200+ studies, gut-immune support"). Avoid disease claims (treats, cures, prevents). Our approved talking points keep you inside the line.

Check your board. State licensing rules on commission-based recommendations vary. We strongly suggest a quick review with your compliance contact or board guidance before you start — once. Most clinicians clear it without issue.

HOW TO GET STARTED

1. Register at treocare.com/healthcare-creators — free, no fee. 2. Immediately start using your unique tracking link. 3. Share with your audience — using our approved talking points and disclosure templates. 4. Commissions paid weekly on all tracked orders.
